PROJECTS

Smart Calculator

May 2021 - Aug 2021

https://github.com/Akash671/software/tree/main/smart_calculator.

Smart Calculator is a python programming-based android application.
I have used python Tkinter in this application.
This application is used to perform basic calculations of mathematics.

Mask Detector Agent

Apr 2021 - Jun 2021

https://github.com/Akash671/software

Mask Detector Agent is a machine learning-based GUI application.
This application is used to detect face masks and TensorFlow is a core part of developing this project.

Covid-19 Test App

Jun 2020 - Aug 2020

https://github.com/Akash671/ML-Project.git

Covid-19 Test Application is a machine learning-based application and basically, this application is used for digital testing of covid-19 patients.

SKILLS

Python Intermediate	**C Programming** Intermediate
Mathematics Advanced	**C++ Programming** Intermediate
Machine Learning Intermediate	**Git Bash** Advanced
GitHub Intermediate	**Linux** Intermediate
